

## Harry Potter Cookies

### Ingredients:

Sugar cookies

White icing

Black icing

Your own choice of color of icing (optional)

Clean Q-tips (optional)

### Directions:

1. Take one plain sugar cookie and completely spread the top of it with white icing.
2. Squeeze your black icing at the top of the face of your cookie for Harry Potter's hair. You may use clean Q-tips to help spread it around and shape his hair or just use your finger. Make sure that you allow some of the hair to fall into his face for a realistic depiction of Harry Potter's look!
3. You may take any color of your choice for icing to make the lightning scar directly underneath his hair. Make sure that it is designed in a zigzag fashion and preferably placed toward the middle or right side of his head.
4. Underneath his lightning scar, make two circles horizontally across his face and make a small arc in between the circles connecting them to make his glasses.
5. You are welcome to make a full face, but the hair, lightning scar, and glasses should be enough to identify your cookie as an edible version of Harry Potter!
